Yeshwantrao Chavan College of Engineering
(An Autonomous Institution affiliated to Rashtrasant Tukadoji Maharaj Nagpur University)
Hingna Road, Wanadongri, Nagpur - 441 110
NAAC A++
Ph.: 07104-237919, 234623, 329249, 329250 Fax: 07104-232376, Website: www.ycce.edu

Department of Computer Technology

Vision Statement of the Department.

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission Statement of the Department.

To nurture computer engineering professionals by offering Dynamic learning environment that encourages problem-solving using emerging technology, National Education Policy aligned evidence-based technical education, fostering ,innovation, research, and industry–institute collaboration & Holistic, ethical and sustainable development for lifelong success.

Session 2026-2027

Vision: Dream of where you want.	**Mission:** Means to achieve Vision

Program Educational Objectives of the program (PEO): (broad statements that describe the professional and career accomplishments)

PEO1	**Preparation**	**P: Preparation**	**Pep-CL abbreviation pronounce as Pep-si-lL easy to recall**
PEO2	**Core Competence**	**E: Environment (Learning Environment)**	
PEO3	**Breadth**	**P: Professionalism**	
PEO4	**Professionalism**	**C: Core Competence**	
PEO5	**Learning Environment**	**L: Breadth (Learning in diverse areas)**	

Program Outcomes (PO): (statements that describe what a student should be able to do and know by the end of a program)

Keywords of POs:
Engineering knowledge,Problem analysis, Design/development of solutions,Conduct Investigations of Complex Problems, Engineering Tool Usage, The Engineer and The World,Ethics, Individual and Collaborative Team work,Communication, Project Management and Finance, Life-Long Learning

PSO Keywords: Cutting edge technologies, Research

"I am an engineer, and I know how to apply engineering knowledge to investigate, analyse and design solutions to complex problems using tools for entire world following all ethics in a collaborative way with proper management skills throughout my life." *to contribute to the development of cutting-edge technologies and Research*.

Integrity: I will adhere to the Laboratory Code of Conduct and ethics in its entirety.

Name and Signature of Student and Date
(Signature and Date in Handwritten)

Name: Shubhankar Hardas

Date: 29/07/2026

Session	2024-25 (ODD)	Course Name	Web Technology Lab
Semester	3	Course Code	23CT1301
Roll No	75	Name of Student	SHUBHANKAR HARDAS

Practical Number	3
Course Outcome	1. Understand various internet technologies. 2. Design the web pages using HTML and CSS. 3. Implement the XML technology to store the data. 4. Develop the interactive web pages using JavaScript.
Aim	**Develop and demonstrate the usage of inline, internal and external style sheets using CSS while creating a Student Registration Form.**
Problem Definition	**To apply the three CSS styling approaches in a single HTML page and observe how inline, internal and externally linked styles can be used to control the appearance and alignment of a student registration form.**
Theory (100 words)	(Cascading Style Sheets) controls the appearance of HTML pages. It can be applied in three ways: inline CSS, internal CSS, and external CSS. These methods allow styles to be added directly to an element, within the HTML document, or through a separate stylesheet.

Vision Statement of the Department.

Procedure and Execution (100 Words)	Step for Implementation: 1. Create the HTML file for the Student Registration Form. 2. Add the external stylesheet reference using the link element and style.css. 3. Add internal CSS in the style element to set the body background and form alignment. 4. Apply inline CSS to the h1 element using the style attribute. 5. Add the registration fields and Submit/Reset buttons. 6. Save the HTML file and open it in a browser. 7. Observe the effect of each CSS method on the webpage and verify the page layout.

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission Statement of the Department.

To nurture computer engineering professionals by offering Dynamic learning environment that encourages problem-solving using emerging technology, National Education Policy aligned evidence-based technical education, fostering ,innovation, research, and industry–institute collaboration & Holistic, ethical and sustainable development for lifelong success.

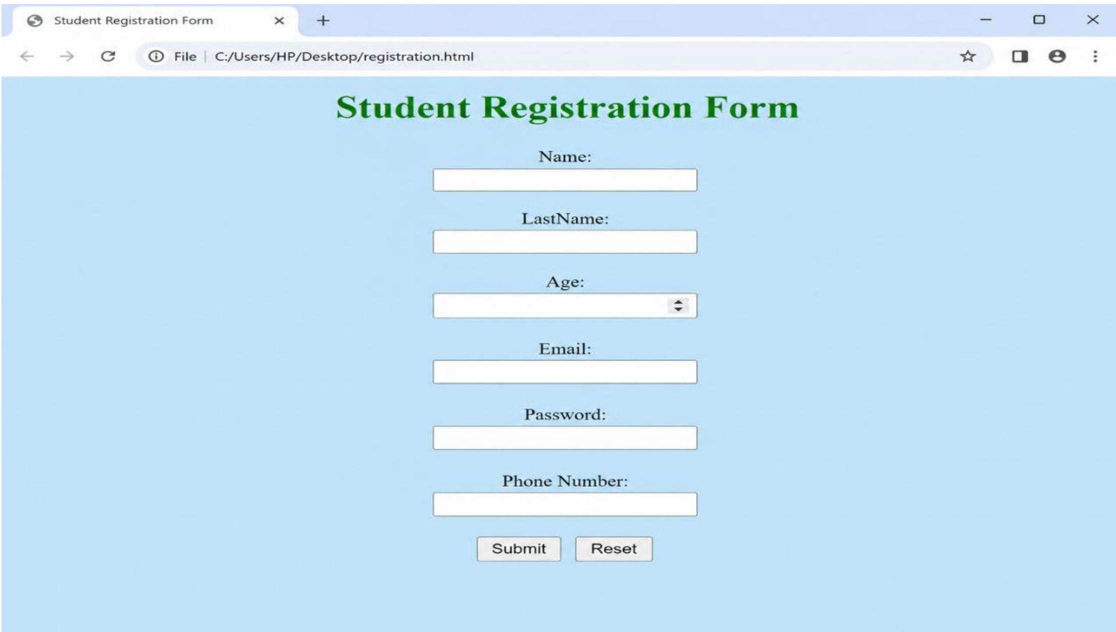
Code:

```
<!DOCTYPE html>
<html>
<head>
  <title>Student Registration Form</title>
  <link rel="stylesheet" href="style.css">
  <style>
    body { background-color: lightblue; }
    form { text-align: center; }
  </style>
</head>
<body>
  <h1 style="color: green; text-align: center;">Student
Registration Form</h1>
  <form>
 Name: <br><input type="text" id="fname"><br><br>LastName:
<br><input type="text" id="lname"><br><br>Age: <br><input
     type="number" id="age"><br><br>Email: <br><input
   type="email" id="email"><br><br>Password: <br><input
        type="password" id="password"><br><br>Phone
Number: <br><input type="text" id="phone"><br><br>
<button type="submit">Submit</button> <button
type="reset">Reset</button>
```

```
  </form>
</body>
</html>
```

Output:

A Student Registration Form is displayed on a light-blue page. The form contents are centered, and the heading appears in green and centered. The page contains Name, LastName, Age, Email, Password and Phone Number fields, along with Submit and Reset buttons.



Output Analysis

The output demonstrates all three CSS methods. The inline style directly changes the heading, the internal stylesheet changes the body background and form alignment, and the external stylesheet is referenced through style.css. No CSS rules for style.css were supplied with the given code, so only the effects explicitly defined in the HTML can be verified from the provided implementation.

Link of student Github profile where lab assignment has been uploaded	**https://github.com/shubhankar2007501**
Conclusion	The Student Registration Form was implemented using inline, internal and external CSS references. The practical demonstrated how CSS can be applied at different levels to control the appearance and layout of an HTML page.
